Linux PCI – Open List

PCIe Open List

- MPS handling for hot-plug devices
- Extended Tagging
- TC/VC Mapping
- Flattening Portal Bridge (FPB)
- Resizable bars

IMS opens

1. Support multiple formats for interrupt messages:
- Current code: IMS core has fixed format for on device IMS
- If some device supports different format-- ????

2. IMS PASID programming:
Where to store the default PASID such that it can be retrieved when programming msi_desc.
