

Embedded Linux & RTOSes: why not both?

Friday, 24 September 2021 10:15 (40 minutes)

One of the first questions you need to answer when embarking on an IoT project is do you use a Linux-based platform versus a RTOS like Zephyr. Is one better than the other? In this talk we'll explore the strengths of each approach, what Linux can learn from RTOSes (and vice versa) and even examples where an IoT device would use Linux *and* an RTOS.
