## Unprivileged CRIU

*Wednesday, September 14, 2022 12:10 PM (25 minutes)*

This talk will discuss on-going changes to CRIU to introduce an “unprivileged” mode, utilizing a minimal set of Linux capabilities that allow for non-root users to checkpoint and restore processes.

It will also touch on a particularly motivating use-case; improving JVM start-up time.

### **I agree to abide by the anti-harassment policy**

Yes
