Abusing zephyr and meta-zephyr

Wednesday, September 14, 2022 10:55 AM (25 minutes)

This talk will talk about the work done to switch from cmake to west in meta-zephyr and how I leveraged this work to do bad things with zephyr and meta-zephyr to generate Yocto Project machine definitions for meta-zephyr. We'll discuss why these patches are not zephyr upstreamable and why autogenerated machine definitions are not included in meta-zephyr.

I agree to abide by the anti-harassment policy

Yes
