## RCU Office Hours BoF

*Tuesday, September 13, 2022 12:00 PM (1h 30m)*

This is a gathering to discuss Linux-kernel RCU-related topics, both internals and usage.

The exact topics depend on all of you, the attendees. In 2018, the focus was entirely on the interaction between RCU and the -rt tree. In 2019, the main gathering had me developing a trivial implementation of RCU on a whiteboard, coding-interview style, complete with immediate feedback on the inevitable bugs. The 2020 and 2021 editions of this BoF were primarily Q&A sessions.

Come (on-site if you can, otherwise virtually) and see what is in store in 2022!

### **I agree to abide by the anti-harassment policy**

Yes

**Primary author:** MCKENNEY, Paul (Meta)

**Presenter:** MCKENNEY, Paul (Meta)

**Session Classification:** BOFs Session

**Track Classification:** Birds of a Feather (BoF)
