eBPF Standardization

Tuesday 13 September 2022 13:00 (30 minutes)

At LSF/MM/BPF, the topic was raised about better documenting eBPF and making "standards" like documentation, especially since we are having runtimes other than just Linux now supporting eBPF.

This presentation will summarize the current state of the eBPF Foundation effort on these lines, how it is organized, and invite discussion and feedback on this topic.

I agree to abide by the anti-harassment policy

Yes
