DAMON Beer/Coffee/Tea Chat

Wednesday, September 14, 2022 5:00 PM (1h 30m)

The third instance of DAMON Beer/Coffee/Tea Chat[1], which is the open, regular, and informal bi-weekly meeting series for DAMON community, will conflict with LPC'22. Let's use this BOF session as a place for doing the community meeting in person. That is, we will discuss any topics about DAMON including but not limited to:

- Introduction of each other (who they are, what kind of interest/expectation they have for DAMON),
- Sharing each person or company's current progress and bottlenecks on their DAMON development/application works,
- Discussions on possible collaborations on DAMON-related works (both on kernel space and user space),
- Discussions on direction and prioritization of DAMON's future,
- Just show each other's face and saying hi, and
- Anything.

Also, this session will have followup QnA and discussions for the kernel summit DAMON talk[2].
