RISC-V support in Android

Monday, 13 November 2023 16:30 (15 minutes)

RISC-V is the first major processor support change for Android since support for ARM64 was added in 2014. This session will outline the current progress of RISC-V support in the Android kernel and discuss GKI, extension support, optimization efforts, and more questions and challenges that have come up so far.
