BASIL The FuSa Spice to spot gaps in kernel testing and more.

Thursday, 19 September 2024 12:45 (45 minutes)

How to track existing LTP tests for a set of syscalls to their man pages and spot gaps?
How can the community be notified by a change to the kernel source code or to the man page?
How to provide a Test environment that is integrated in an automated CI workflow?
We'll discuss how BASIL can answers some of these questions.
