Agentic AI, confidential computing and attested TLS

Friday 12 December 2025 15:45 (45 minutes)

We aim to bootstrap some discussions on the intersections of the following topics:

- Agentic AI
- Confidential Computing (MC on this already exists)
- Attested TLS

To initiate discussion, I will present a few slides to introduce the above, then pose some open questions. We very much welcome presentations by attendees on related topics. If you are interested in presenting, please contact me with title and expected time.
