## Generic power domains (genpd) framework improvements

*Thursday, November 15, 2018 10:10 AM (20 minutes)*

The Generic PM domains framework (genpd) keeps evolving to deal with new problems. Lately, we have for example seen genpd to incorporate support for active states power management and also support for multiple PM domains per device. Let's walk through these new changes that have been made and discuss their impact.
