## Remote page faults over RDMA

*Thursday, November 15, 2018 10:00 AM (30 minutes)*

Discussion of the best way to govern 3rd party memory registration and if it is acceptable to implement RDMA-specific functionality (in this case, page fault handling) inside the kernel in order to avoid exposing additional interfaces.

**Presenters:** NIDER, Joel; RAPOPORT, Mike (IBM)

**Session Classification:** RDMA MC
