Experiences from Andes Technology

Thursday, November 15, 2018 12:00 PM (30 minutes)

Andes Technology involved in RISC-V Linux Development since mid -2017 and have submitted 20+ patches to enhance functionality. We will discuss challenges supporting features such as loadable module, perf, ELF attributes, ASID, cache coherence and AndeStar V5 extension specific problems.

Presenters: KAO, Alan (Andes Technology); LI, Zong (Andes Technology)

Session Classification: RISC-V MC
