LVM, Device Mapper and DM-Linear

Wednesday, 14 November 2018 15:15 (15 minutes)

The Android OS is stored on signed, read-only partitions. Sizing these partitions is difficult. After a few years, a major OS pdate may no longer fit in a device's existing partitions. To use space more intelligently, we are introducing a userspace partitioning system based on dm-linear, similar to LVM.
