Full dynticks / Isolation roadmap

- **Fix cpustat freeze (user and sys fields in /proc/stat won't move)**

- **Code cleanup in tick-sched.c**

- **Rethink context tracking**

- **Make nohz_full mutable through cpusets**

Full dynticks / Isolation roadmap

- **But then what about RT?**

- **What is needed?**

- **How can I help (beside reviewing) ?**
