netfilter hardware offloads

Monday, September 9, 2019 5:00 PM (45 minutes)

With the advent of the the flow rule and flow block API, ethtool_rx, netfilter and tc can share the same infrastructure to represent hardware offloads.

This presentation discusses the reuse of the existing infrastructure originally implemented by tc, such as the netdev_ops->ndo_setup_tc() interface and the TC_SETUP_CLSFLOWER classifier.

I agree to abide by the anti-harassment policy

Yes

I confirm that I am already registered for LPC 2019
