

Networking Androids

Thursday, August 27, 2020 7:45 AM (45 minutes)

Android Networking - update for 2020:

- what are our pain points wrt. kernel & networking in general,
- progress on upstreaming Android Common Kernel networking code,
- and the unknown depths of non-common vendor changes,
- how we're using bpf,
- how it's working,
- what's not working,
- how it's better than writing kernel code,
- why it's so much worse,
- etc...

I agree to abide by the anti-harassment policy

I agree
