

BoF: GDB

Monday 24 August 2020 07:00 (25 minutes)

GDB BoF, for GDB developers to meet and discuss any topic about the GDB development process.

Some proposed discussion topics are:

- The moving of gdbsupport and gdbserver, is anything left? Is there anything more to moved from the gdb to gdbsupport?
- Replacing of macros with a more C++-like API (like what has been started from the type system). Other C++-ification.
- Feedback on the new version numbering scheme.
- Large changes that people would like to pre-announce.
- Unsure how to approach the task of contributing an upstream port? This would be a good time to ask.

But really this is about what **you** want to discuss, so don't hesitate to propose more topics. Please notify the moderator (Simon Marchi) in advance if possible, just so we can get a good overview of what people want to talk about.

I agree to abide by the anti-harassment policy

I agree
