

3D Printing.

Friday, August 28, 2020 8:00 AM (45 minutes)

3D printing continues to be to be a hot topic, with both vendors and standards organizations competing to see who will determine how it will be used. This session will talk a little about the history of 3D printing, provide an overview of current standards efforts, and finally talk about the software and infrastructure that is needed on Linux to make 3D printing more accessible.

I agree to abide by the anti-harassment policy

I agree
