

BoF: RCU Implementation

Wednesday 26 August 2020 10:00 (45 minutes)

This is a gathering to discuss Linux-kernel RCU internals.

The exact topics depend on all of you, the attendees. In 2018, the focus was entirely on the interaction between RCU and the -rt tree. In 2019, the main gathering had me developing a trivial implementation of RCU on a whiteboard, coding-interview style, complete with immediate feedback on the inevitable bugs.

Come (virtually!) and see what is in store in 2020!

I agree to abide by the anti-harassment policy
