

LLVM BOF

Monday 24 August 2020 09:00 (45 minutes)

Come join us to work through issues specific to building the Linux kernel with LLVM. In addition to our Micro Conference, let's carve out time to follow up on unresolved topics from our meetup in February:

- Improving our home page
- Status of each architecture
- Call to action / how to get started / Evangelism
- Improving Documentation/
- Maintainer model
- Minimum supported versions of LLVM
- s390 virtualized testing
- Follow ups to Rust in Kernel MC session

Potential Attendees: Nathan Chancellor, Sedat Dilek, Masahiro Yamada, Sami Tolvanen, Kees Cook, Arnd Bergmann, Vasily Gorbik.

I agree to abide by the anti-harassment policy
