

GCC's -fanalyzer option

Tuesday, August 25, 2020 10:00 AM (25 minutes)

I'll be talking about the -fanalyzer static analysis option I added in GCC 10; give an overview of the internal implementation, its current strengths and limitations, on how I'm reworking it for GCC 11, and ideas for future directions.

I agree to abide by the anti-harassment policy
