

The LLVM/GCC BoF

Wednesday, August 26, 2020 7:30 AM (25 minutes)

We had a panel led discussion at last year's GNU Tools Cauldron and more recently at the FOSDEM LLVM Developer's room on improving cooperation between GNU and LLVM projects. This year we are proposing an open format BoF, particularly because we believe that being part of LPC and a virtual conference we may have more LLVM and GNU developers in the same (virtual) room.

At both previous session we have explored the issues, but struggled to come up with concrete actions to improve cooperation. This BoF will attempt to find concrete actions that can be taken.

I agree to abide by the anti-harassment policy
