

Lightning talk: RISC-V Bitmanip optimizations

Thursday, August 27, 2020 8:00 AM (10 minutes)

Support for the bit manipulation extension to RISC-V is currently out-of-tree and represents work by Jim Wilson at SiFive, Claire Wolf at Symbiotic EDA and Maxim Blinov at Embecosm. Since last year, I have been working on additional optimizations for the bit manipulation extension, which I shall present.
