

CI systems and Clang

Thursday 27 August 2020 10:30 (30 minutes)

Multiple CI efforts to provide coverage of the Linux kernel are now building and providing results of builds with Clang (KernelCI, 0day bot, Linaro toolchain team and tuxbuild team, Clang Built Linux). Let's all meet to discuss what's working, what can be improved, the current status of builds of various architectures, and what the future direction of testing the various LLVM utilities might look like.
