Power management of interdependent devices

Friday, 28 August 2020 10:00 (25 minutes)

Over time computers get more and more complicated and there are more and more dependencies between devices in them which affect power management.

We will discuss issues arising from that and possible ways to address them.

See https://lore.kernel.org/linux-pm/20200624103247.7115-1-daniel.baluta@oss.nxp.com/T/#mbe0060ea9b225073d63ae3ff8b1acd96985f29
for a patch series submission related to that problem space.
