

Plasma on Mobile devices

Friday, August 28, 2020 8:30 AM (45 minutes)

KDE, previously known as the one of the Desktop Environment evolved into one of the largest Free and Open-source software community at one point. Currently one of the projects supported by community is Plasma Mobile: open-source user interface and ecosystem running on top of the Linux distribution.

This talk aims to talk about journey of the Plasma Mobile, how it evolved into what it is today, and it's future.

- Initial development of the Plasma Mobile
- Basic architecture details
- Advantages to KDE community
- Application ecosystem and development
- Future for Plasma Mobile
